- Attach Scope of Work narrative; include methods of inerting tank(s) and monitoring LEL and Oxygen
- Attach Site Safety Plan
- Attach copies of Closure Notification to State of Colorado Oil, Div. & Public Safety (10 day notification)

\*\*\*\*\*

Tanks that have been out of service for a period of 1 year shall be removed.

The removal of under-ground and above-ground tanks shall be in accordance with the International Fire Code (IFC), 2012, as amended, and the National Fire Protection Association (NFPA) Standard 30, Flammable and Combustible Liquids Code, current edition.

1. Remove flammable and combustible liquids from the tank and connecting piping.
2. Disconnect piping at tank openings which is not to be used further.
3. Remove piping from the ground.  
Except: The Fire official may allow piping to be abandoned in-place where removal is not practical. Cap and safeguard all abandoned piping as required by the fire code official.
4. Cap or plug all tank openings. Leave a 0.125-inch to 0.25-inch-diameter opening for pressure equalization.
5. Purge of vapor and inert tanks prior to removal.
6. Tanks shall be disposed of in accordance with federal, state and local regulations.
